

3 Segment Hydraulic Re-Rounding Clamp

The 3 Segment Hydraulic Re-Rounding Clamp is a robust, hydraulically operated tool designed to correct ovality in plastic pipes prior to the welding process. The clamp features a heavy-duty welded steel construction, making it suitable for larger diameter pipes. Its wide contact area ensures effective and uniform pipe reshaping while minimizing surface damage. Reducing shells are available to accommodate different pipe sizes. For larger models, a closure winch is included to facilitate easier installation and operation.

FEATURES

- Hydraulically powered
- Perfect for pipe sizes 400 - 1200mm
- Supplied with pump
- Fitted with easy release couplings
- Provides re-rounding capabilities
- Mild steel robust design with lightweight hydraulic pump
- Wide contact area
- Winch included for easier installation on larger models

3 Segment Hydraulic Re-Rounding Clamp

Re-Rounding Clamps

Code	Description
01-08-100	400mm Ø re-rounding clamp, with pump
01-08-103	500mm Ø re-rounding clamp, with pump
01-08-106	630mm Ø re-rounding clamp, with pump
01-08-111	710mm Ø re-rounding clamp, with pump
01-08-112	800mm Ø re-rounding clamp, with pump and winch
01-08-113	900mm Ø re-rounding clamp, with pump and winch
01-08-114	1000mm Ø re-rounding clamp, with pump and winch
01-08-751	1200mm Ø re-rounding clamp, with pump and winch
01-08-101	400-355mm Ø reducing shell set (3 pcs)
01-08-102	400-315mm Ø reducing shell set (3 pcs)
01-08-104	500-450mm Ø reducing shell set (3 pcs)
01-08-105	500-400mm Ø reducing shell set (3 pcs)
01-08-107	630-560mm Ø reducing shell set (3 pcs)
01-08-108	630-500mm Ø reducing shell set (3 pcs)
01-08-110	710-630mm Ø reducing shell set (3 pcs)
